

TEJA VENKAT KUNDEM

Software Engineer | Python • Django/FastAPI • AI/LLM • Cloud & DevOps

Andhra Pradesh, India | +91 96185 47741 | tejavenkat562@gmail.com

[linkedin.com/in/teja-venkat-kundem](https://www.linkedin.com/in/teja-venkat-kundem) | github.com/tejavenkat29

PROFESSIONAL SUMMARY

Software Engineer with 1+ years of experience building production backends and real-time AI systems in Python (Django, DRF, FastAPI). Shipped 10+ REST APIs and cut API response time 25–30%, and built low-latency LLM pipelines with OpenAI and Anthropic Claude. Experienced across cloud and DevOps — Docker, Kubernetes, CI/CD (GitHub Actions), AWS, and Linux — with monitoring via Grafana and Prometheus. Strong in microservices, distributed systems, databases, and REST integrations, with a self-driven, fast-learning approach to owning production systems.

TECHNICAL SKILLS

Languages: Python, SQL, Bash, JavaScript

Backend & APIs: Django, Django REST Framework (DRF), FastAPI, Celery, REST APIs, Microservices, OAuth 2.0, JWT

AI & LLM: OpenAI API, Anthropic Claude API, LangChain, LangGraph, Prompt Engineering, Scikit-learn, LLM Application Development

Cloud & DevOps: AWS (EC2, S3, SQS), Docker, Kubernetes, CI/CD (GitHub Actions), Terraform, Ansible, Linux, Nginx

Monitoring & Observability: Grafana, Prometheus, Datadog, Alerting, Logging, Metrics/Telemetry

Databases: PostgreSQL, MongoDB, Redis, Elasticsearch, MySQL

Version Control & Practices: Git, GitHub, System Design, Design Patterns, Agile/Scrum, Testing, Debugging, Clean Code

PROFESSIONAL EXPERIENCE

Software Engineer — Gamyam Info Tech LLP

Aug 2025 – Present

Python • Django • DRF • FastAPI • Docker • Kubernetes • AWS • CI/CD

Andhra Pradesh, India

- Shipped 10+ production REST APIs in Django/DRF for high-volume traffic; cut API response time 25–30% via query optimization, indexing, connection pooling, and Redis caching.
- Built real-time LLM pipelines and a dual-agent system (OpenAI Realtime + Anthropic Claude on AWS Bedrock) with a safety classifier across English, Hindi, and Telugu.
- Designed a microservices architecture with clear boundaries using PostgreSQL and MongoDB for structured and unstructured data.
- Containerized services with Docker and automated CI/CD via GitHub Actions; deployed to AWS (EC2, S3) and operated Kubernetes in production.
- Set up monitoring and alerting with Grafana, Prometheus, and Datadog; secured APIs with OAuth 2.0 / JWT, RBAC, and HMAC signing.
- Delivered backend microservices for Practo client platforms (health checkup & diagnostics): booking/order-lifecycle APIs, lab integrations, and webhooks.

AI Engineer Intern — Gamyam Info Tech LLP

May 2025 – Jul 2025

Python • Scikit-learn • ML Pipelines

Hyderabad, India

- Developed and trained ML models with Scikit-learn and integrated inference into backend services via clean REST interfaces for product teams.

PROJECTS

Aayu — Real-Time Speech-to-Speech AI Voice Companion

Python • FastAPI • OpenAI Realtime • Claude • Celery • Redis • PostgreSQL • AWS

- Engineered a low-latency voice pipeline (VAD → STT → LLM → TTS) with async post-session processing; containerized on AWS with per-request telemetry and dashboards.

Practo — Diagnostics Platform (Kubernetes in Production)

Python • Django • Kubernetes • Elasticsearch • Celery • Redis • AWS SQS

- Built booking/order-lifecycle APIs and lab integrations; optimized search with Elasticsearch and deployed to a Kubernetes production environment.

EDUCATION

B.Tech, Computer Science & Engineering — BVC Engineering College

2021 – 2025 | CGPA: 8.10
